Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

1. Claims 39-58 and 60 are rejected under 35 U.S.C. 102(b) as being anticipated by Lau et al. (5,158, 548).

As to claims 39-58 and 60, Lau-' 548 (Fig. 11, for example) discloses stent 14 comprising first/second/third undulating band-like element interconnected by interconnecting elements as recited in the claims and as shown in the reproduced copy of Fig. 11 on next page. Notice that Lau-'548's Fig. 11 have more structures than the present invention. However, Lau-'548 includes all claimed limitation in the claims.

3. Claim 59 is rejected under 35 U.S.C. 102(e) as being anticipated by BERRY et al. (6,231,598).

BERRY (Fig. 5, for example) shows interconnected first and second serpentine circumferential bands 14 and 21 respectively, wherein first serpentine circumferential bands 14 having more turns and longer longitudinal length than those of second serpentine bands 21 as recited in the claim. Notice that bands 14 can be considered as serpentine circumferential

bands because bands 14 have peaks and trough. The claim language does not provide any structural limitation to make the difference between the claimed invention and the serpentine circumferential bands 14 of Berry.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 54, 56-57 and 61 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lau et al. (5,158, 548) in view of Ersek (3,657,744).

As to claims 54, 56-57 and 61, Lau-'548 discloses a stent structure substantially as recited in the claims, except for the number of interconnecting members are omitted. However, Ersek (Figs. 2-3) discloses stent 16A and 16B without some of connecting elements to provide openings for branch connection. It would be obvious to one of ordinary skill in the art at the time the invention was made to omit one or more interconnecting element between band-like elements of Lau-'548 stent to provide openings for branch connection.

Response to Arguments

Applicant's arguments filed 11/15/2004 have been fully considered but they are moot in view of new rejection based on new references.
